

CCS 5th Grade Enrichment Activities

Language Arts	Math	Science	Social Studies
Write a poem about an animal of your choice. Include figurative language such as personification, similes, metaphors, idioms, and hyperbole.	Create a board game that tests the knowledge of solving equations using addition, subtraction, multiplication and division. 1. Create the game board. 2. Construct rules and directions for the game. 3. Create 25 question cards. 4. Design game pieces and a box. 5. Find a partner and play.	Create a comic that talks about what clouds are, how they are created, and which clouds are visible during different weather conditions. Try to include at least 8 panels.	Write a diary entry from the perspective of John Smith. Include how his life was affected by life at Jamestown and interacting with the Native Americans.
Choose a photograph or art print, from a book, or find one on the internet. Describe the picture in as much detail as possible by using specific sensory words and adjectives.	Find a recipe for something that you would like to cook or bake. Create a table listing all of the ingredients. Make a column in the table estimating the cost to purchase each item. Go to your local grocery store's webpage and find the actual price for each item. In the last column find the difference between your estimate and the real price.	Create a script between a scientist and an interviewer reporting about a life-science concept. Use your vocabulary words in the script.	Make a 3 column chart of the colonial regions: New England, Middle and Southern Colonies. Tell about the geography, economy, climate, and agriculture of each region. Include which of the original 13 colonies were in that region.
Imagine you are a Native American or Colonist. Write a journal page narrative of a day in your life. Be as historically accurate as possible.	There are 24 hours in a day, 60 minutes in an hour, and 60 seconds in a minute. Based on these relationships: How many seconds are in 1 hour? How many minutes are in 1 day? How many hours are in 1 month?	Write and illustrate a children's book on Newton's 3rd Law of Motion. The law states for every action there is an equal and opposite reaction. Be creative!	How did conquistadors change the economy and social climate of the lands they conquered? Visit: Who were the conquistadors? Write a newspaper ad as if you were King of a European country recruiting conquistadors for travel to new lands.

Choose a popular song. Change the lyrics to write a parody on a topic of your choice.	Create a table to display the value of each coin as a fraction of a dollar. Explore the relationship between fractions and money amounts. Convert the fractions to percentages. Using this information, create at least 8 challenging questions. Create an answer key.	Make a table and record the weather and the weather predictions for a week. Compare and contrast the forecast and the actual weather report.	Various governments influenced the development of the United States government such as Roman, Greek, Iroquois, European and British. Make a foldable and show the various ways the US was influenced by these early governments.
The events of 2020 will likely become a big part of history. Write in a daily or weekly journal. What do you want to remember about this time? Include drawings or pictures.	Make a Wanted Poster about a specific quadrilateral. You will need to include a picture of the quadrilateral, its name and specific characteristics about that quadrilateral so that others may know what they're looking for.	Create a concept map that explains the similarities and differences between you and your parents. Be sure to include the inherited genetic traits you got from each. Did you inherit any traits from another relative?	Analyze historical documents that shaped the foundation of the United States government. The Emancipation Proclamation authorized the recruitment of African Americans as Union soldiers. How did this impact the Civil War and Reconstruction?
